

Assignment #2

2019006171 김은민

운영체제
Windows 10

이클립스 버전
4.18.0.v20201202-1800
Build id: I20201202-1800

자바 버전
java 15.0.2 2021-01-19

Classes & Methods

Activity.java

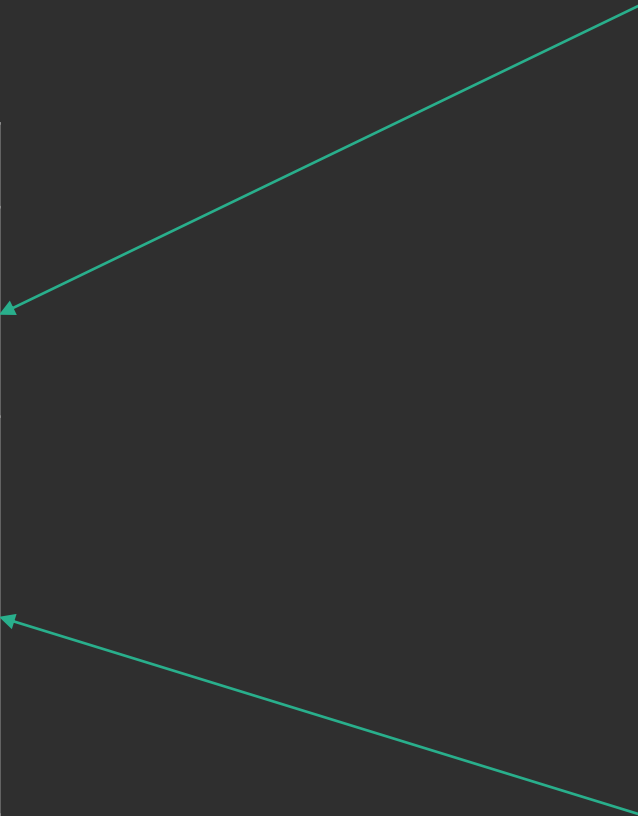

Activity
<ul style="list-style-type: none">- Name : String- Location : String- Price : int
<ul style="list-style-type: none">- Activity()- Activity(activity)- Getter, setter- toString()- Equals(activity)- getActualPrice(Person)

ExtremeActivity.java

ExtremeActivity
<ul style="list-style-type: none">- minHeight : int- minWeight : int
<ul style="list-style-type: none">- ExtremeActivity()- ExtremeActivity(ExtremeActivity)- getMinHeight() : int- getMinWeight() : int- getActualPrice(Person)

ShowActivity.java

ShowActivity
<ul style="list-style-type: none">- minAge : int
<ul style="list-style-type: none">- ShowActivity()- ShowActivity>ShowActivity)- getActualPrice(Person)

Classes & Methods

Person.java

Person
<ul style="list-style-type: none">- Name : String- Age : int- Height : int- Weight : int
<ul style="list-style-type: none">- Person()- Person(Person)- Getter, setter

Schedule.java

Schedule
<ul style="list-style-type: none">- Name : String- Days : int- Plan : Activity[][]- Expense : int- scheduleNum : static int- Member : Person[]
<ul style="list-style-type: none">- Schedule()- Schedule(Schedule)- getName() : String- setName(String)- addActivity()- checkIfInPlan(Activity)- printActivity()- deleteActivity()- getMember() : Person[]- printMember()

Throw **InvalidAccessException**
When the activity is already in plan

Throw **InvalidAccessException**
the plan is filled with other activity

Throw **InvalidAccessException**
No activity to delete

Classes & Methods

Exception
- ...
- ...
